

Freshfields Bruckhaus Deringer

Showcasing Furniture Longevity

Project Outline

To project manage the furnishings with OMG Consulting to create stimulating new workspaces for over 250 staff showcasing task-based working at its best. Over half the space was to be devoted to breakout and touchdown spaces to encourage optimal social engagement and collaboration.

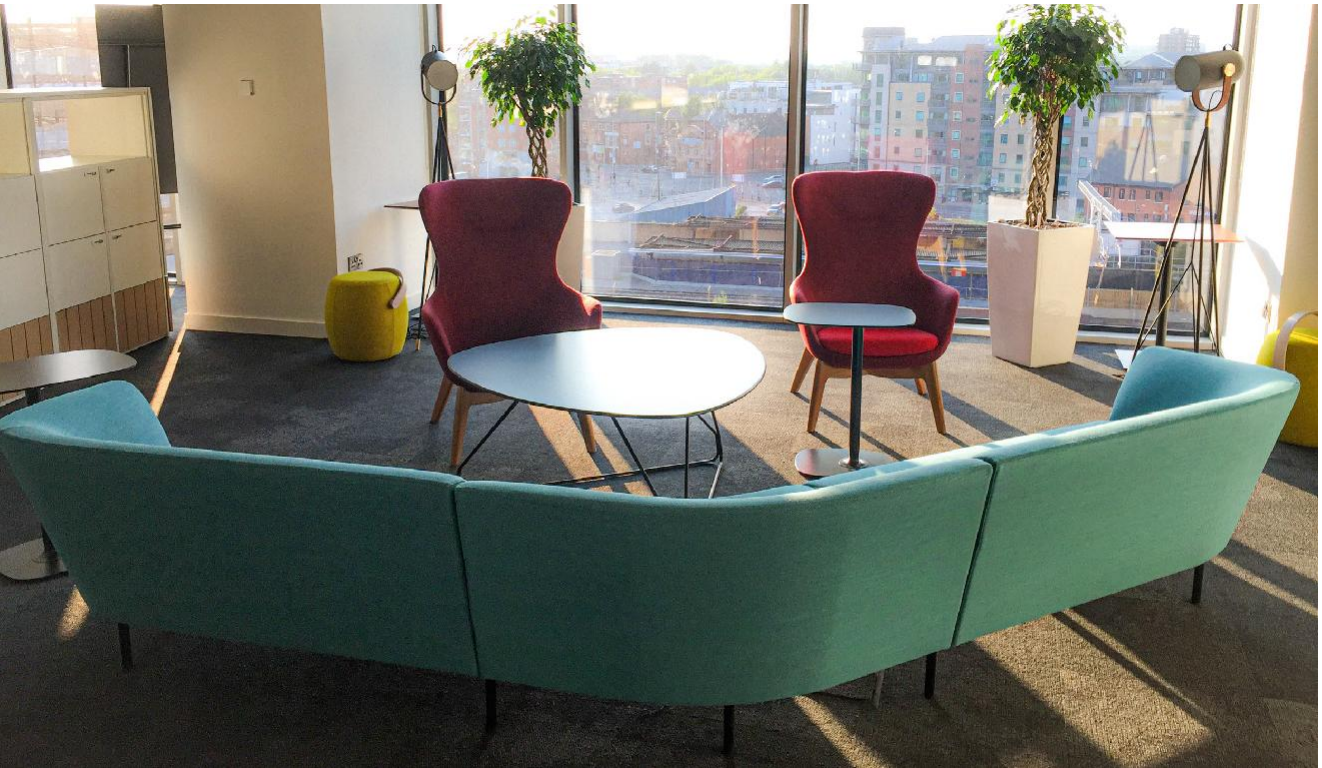

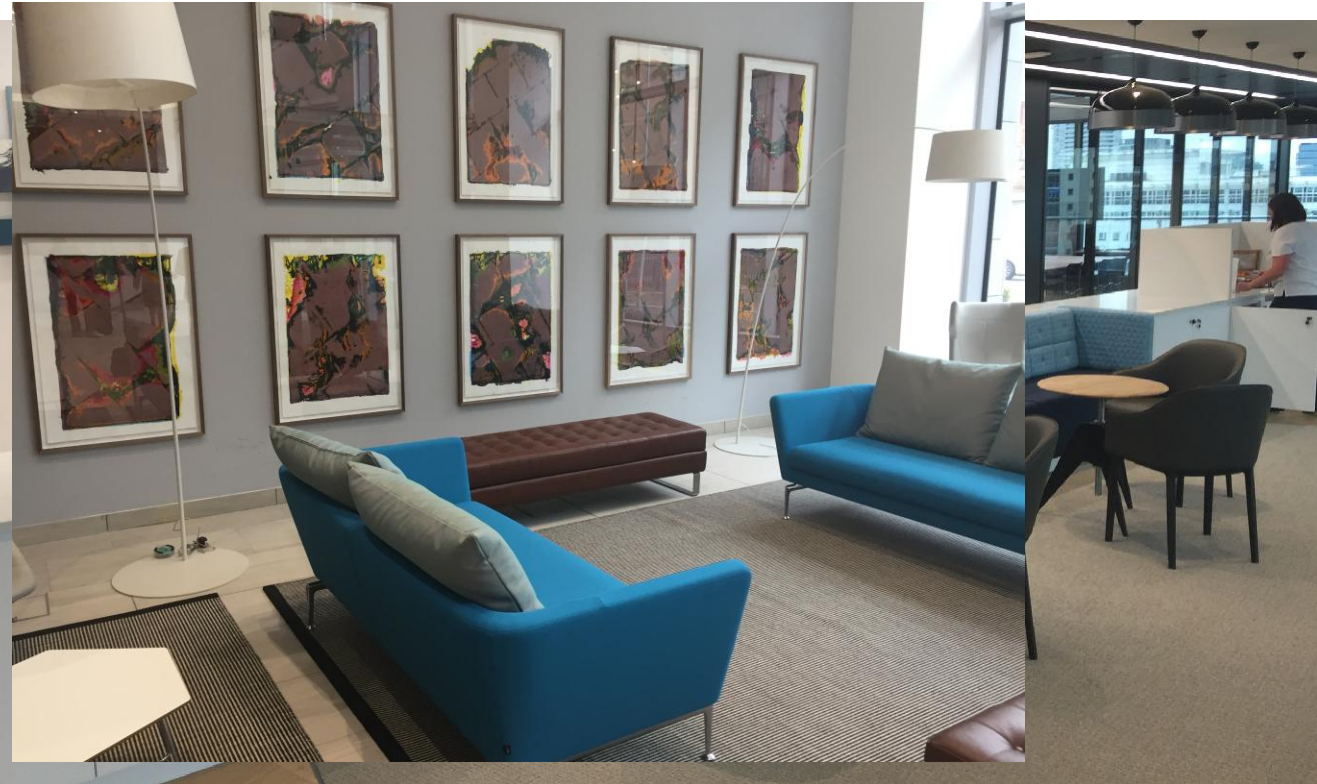

User comfort, adjustable design and individual control over working spaces was required for optimal wellbeing and performance – as was easy access to power as standard. This would require product testing and sampling with feedback integrated into eventual furniture selections.

Key Outcome

Site-based product roadshows and testing with stakeholders enabled JPA to select and specify the most appropriate products for these works, hand-picked from marketplace. This ensured user comfort and satisfaction.

JPA provided a 10 year supported warranty on all items supplied to optimize investment through long term value and reduced waste. JPA additionally provide maintenance services after warranty expires in addition to take-back and end of life re-use if still fit-for-task or recycling.

Any redundant furniture items were re-used, re-sold, rehomed and recycled as appropriate with zero to landfill.
