Case Study

Hertfordshire Chamber

Showcasing Furniture Longevity

Project Outline

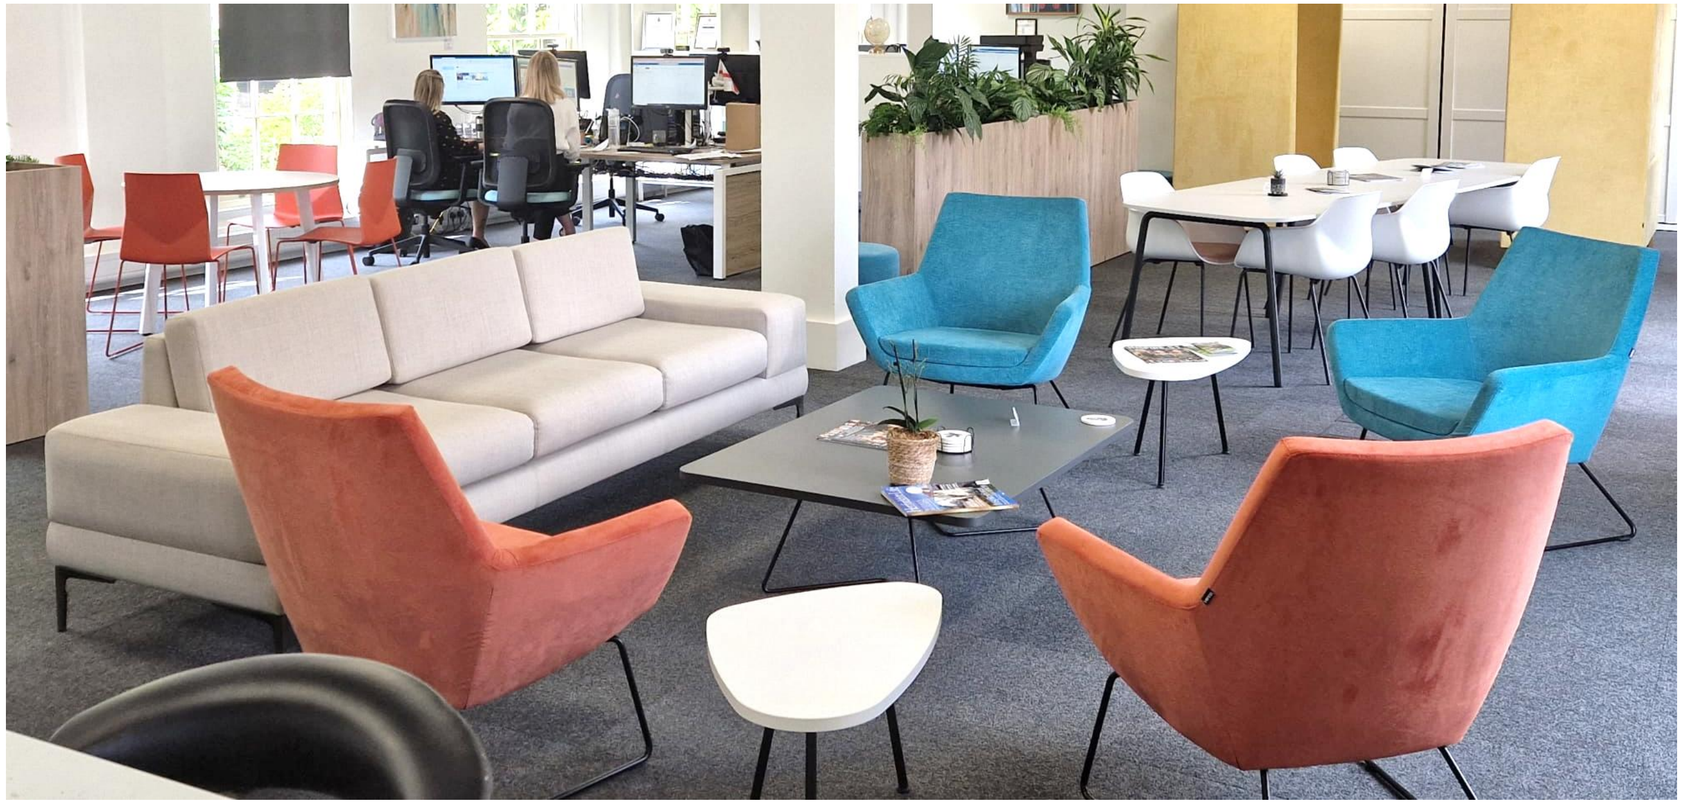

Designing and furnishing new office space for the Hertfordshire Chamber of Commerce was an exciting local project, affording the opportunity to design a workspace around the specific needs of the Chamber team for the first time, increasing user wellbeing and productivity.

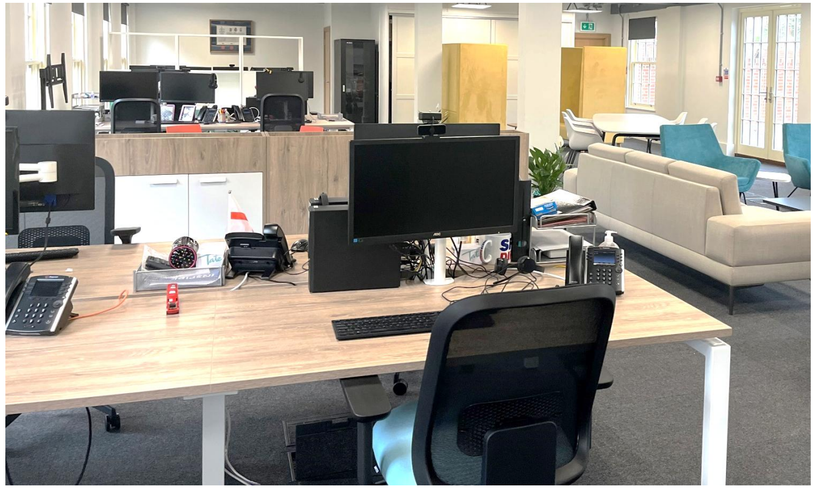

It also afforded the opportunity to visually strengthen corporate workspace identity and branding having previously rented furnished offices with limited capacity for change.

The aim of having their own space and own front door for the first time, was to enable the Chamber to better serve its members making a tangible impact not only on both the Herts Chamber team and, the local business community.

The works were also intended to demonstrate the benefits of local collaborative partnerships with ongoing product support and reconfiguration available as the needs of the team change.

As part of their NetZero commitment, the Chamber also wanted to showcase the carbon cost of these works to use a baseline for future reduction.

Hertfordshire Chamber

Showcasing Furniture Longevity

Key Outcomes

- → **114** Items of furniture supplied
- → **5,626kg** CO2e of embodied carbon in furniture supplied
- → **E**mbodied furniture carbon offset by JPA
- → Carbon Neutral delivery and installation
- → Zero to landfill, 100% packaging recycled
- → Key items stored by JPA during transition
- → Unique local, ongoing collaboration

Client Feedback

"JPA Workspaces have designed our Chamber office to showcase creative, workable, collaborative, vibrant and sustainable ways to get the most out of our working environment.

Assisting us right from the beginning with planning our move from our previous office, packaging, moving, storing and relocating, JPA Workspaces made this huge operation a breeze....

Together we chose colour swatches, furniture, plants and created an environment where our members and team love to come to work and collaborate with each other.

Keeping the heart in Herts is our joint philosophy. Using local supply chains, skills and sustainable products allowed us to maintain our mission of being the 'voice of business in Hertfordshire' whilst our 'Go Green and Grow' campaign takes us to our future together!"

Naomi Powell, Operations Director
