

Pembroke College

Showcasing Furniture Longevity

Project Outline

JPA Workspaces designed, planned and selected the furnishings for this new building, ensuring flexibility and functionality for optimal multi-use space for a wide range of stakeholders including students, staff, visitors and community.

Furnishings were selected to work in harmony with the new architecture and included the manufacture of bespoke items including the new boardroom suite with inlaid crests and tailor-made timber veneer meeting tables. Auditorium, meeting, café, breakout and student accommodations were all included in the brief.

To optimise conference income, all public areas were designed with optimal flexibility and reconfigurability i.e. flip top tables, high density staking chairs and retractable bleacher seating .

Key Outcomes

Project delivered and installed to timescale and budget, installed out of hours and over weekends.

JPA provided a 10 year supported warranty on furniture supplied to optimise investment through long-term value and reduced waste. JPA additionally provide maintenance services after warranty expires and furniture take-back services, community rehoming and materials recycling at end of life.

JPA's supported furniture programme is anticipated to save clients 50% cost and 50% carbon due to extended lifecycles.
