

Rothamsted Enterprises

Showcasing Local Partnerships & Furniture Longevity

Project Outline

Post-Covid, the restoration of the beautiful Russell Building and transformation into serviced offices and co-working spaces was designed with user wellbeing at its heart. Special consideration was given to functionality, comfort, inclusivity and accessibility and the design of this space as an exemplar of workspaces of the future.

Working with the architects, JPA helped to specify and furnish to brief, delivering a people-centric sustainable solution reflecting Rothamsted Enterprises' vision and mission.

A furnished show-office enabled prospective tenants to better visualize spaces, accelerating occupancy rates and timelines.

Key Outcomes

Flexible multi-use spaces were created with widespread connectivity also providing choice of how and where to work. All works were brought in on budget and agreed timelines with high client and user satisfaction ratings.

The installation was Carbon Neutral with zero packaging waste. All furniture items supplied are recyclable by JPA at end of life with zero to landfill.
